

SKILL TECH ESAC86

STANDARD ELECTRIC PROJECTION SCREEN -86"/4:3

DESCRIPTION

The Electric Projection Screen SH EPS86 is perfect for education, commercial presentations or residential home cinema. This screen is equipped silent operation synchronized motor with extended operational longevity and low power consumption. The included standard Radio Frequency (RF) remote control allows operating the screen freely in the room. Its 3-way wall switch provides additional control options. Black backed screen material eliminates light penetration for superior color reproduction. Standard 4-side black masking borders. Fiberglass matte white screen material with 1.2 gain and 120° viewing angle is durable and easy to clean. Tubular motor on option. The projection area of this 86" screen is: 1.72x1.30m.

FEATURES

Silent Tubular Motor: offers extended operational longevity and low power consumption

3-Way Wall Switch: provides additional control options

4-side black Masking Borders: enhance picture contrast

Cleanable Screen Material: for easy maintenance

Radio Frequency (RF) Remote: provides control integration for an effortless viewing experience

Wall/Ceiling End Cap Design: allows for multiple configurations and versatility in installation and setup

Black-Backed Screen Material: eliminates light penetration for superior color reproduction

Steel Case: heavy-duty roller and reliable spring inside
